

At Telosa Software, we are committed to running an environmentally sustainable business that leaves as small an eco-footprint as possible. We pride ourselves on being one of the most environmentally responsible companies in our industry.

Reducing our Carbon Footprint

Telosa Software, Inc. headquarters in Palo Alto, California runs entirely on 100% clean energy. Through the [Palo Alto Green program](#), we purchase 100% of our energy from wind and solar generation sources. Telosa's commitment to clean energy prevents, on average, the emission of 36,072 pounds of greenhouse gases from entering the atmosphere annually. This has the equivalent environmental benefit of removing 3.5 cars from the road or protecting over 13 acres of forest.

Certified Green

Telosa Software, Inc. is proud to be certified "green" by the [Green Business Program](#). This means we have met specific requirements to become certified and below are just a few examples:

- **Solid Waste Reduction and Recycling**

Most of our printed materials and our CD envelopes are printed on 100% recycled content and printed with vegetable based inks.

- **Energy Conservation**

Telosa performed an energy audit and replaced all of our lighting with high-efficiency fluorescent ballasts and bulbs. We also use [100% green energy](#) from our local utility company.

- **Water Conservation**

Following an indoor and outdoor water audit, we have installed low flow fixtures throughout our office as well as water conserving exterior irrigation and landscaping.

- **Pollution Prevention**

Telosa Software offers incentives for employees to take public transportation. We now have almost 50% of our staff telecommuting, carpooling, using public transportation, or driving hybrid cars. In addition, we purchase carbon offsets for all Telosa employee's air travel from [NativeEnergy](#).
